1.7. “GUIDE” FOR LSD RESULT MEASUREMENTS

With recent developments in measuring LSD stones for, it can be helpful to have an approximate value in your head so that you might spot any error before you move the stone away and lose the chance to re-measure if in any doubt.

The following figures apply to:

➔ All readings with the tape LSD measures or laser measure (minimum reading)

AND

Readings from **BOTH** types of device have been inputted into the Curl Distance App i.e. **NOT** the reading off the instrument

- Stone covering centre pin ➔ less than 14.2cm
- Stone not covering pin but biting 1 foot circle ➔ between 14.2cm - 44.0cm
- Stone biting 4 foot circle ➔ less than 75cm
- Stone biting 8 foot circle ➔ less than 137cm
- Stone biting 12 foot circle ➔ less than 197cm
